

***Your Wildcat EP package comes supplied with an extra strut (AQUB8803). If you feel you need to replace the strut, here is a simple set of instructions on how to do so.***

1. Remove the canopy from the top of the boat.
2. Using a 1.5mm hex wrench, loosen the two set screws holding the drive cable to the drive cable coupler.
3. From the back of the boat, grasp the prop and slide the drive out the back of the boat.
4. Using a Phillips screwdriver, remove the 4 screws that hold the strut and rudder bracket to the back of the boat.
5. Remove the strut by sliding it straight back off the brass stuffing tube.
6. Install the new strut by reversing the disassembly procedure. Be careful not to overtighten the screws.
