

Motley Crew

IMPORTANT — REQUIRED BEFORE OPERATION!

AquaCraft Models is committed to providing you with the best possible products, from their design and manufacturing to the packaging and shipping.

At the factory, a small piece of water cooling line was placed over your Motley Crew's water cooling pickup. This prevented debris from entering the pickup during shipment.

Take a moment NOW to remove this protective tubing from the pickup, as shown in the photographs. Leaving it in place will cause the on-board electronics to fail due to insufficient cooling.

Thank you for choosing the Motley Crew and taking this small step prior to operation. Please visit our web site at aquacraftmodels.com for the latest information on all AquaCraft products — and watch for more exciting releases coming soon!
