

DROMIDA™

IMPORTANT!

The charger in your Dromida kit has been upgraded to a USB fast charger. Please follow the instructions below when charging.

1. Unplug the battery and remove it from the vehicle.
 2. Plug the charger into any USB port or USB adapter with an output $\geq 1A$ (not included, use part DIDP1125 as an optional accessory). The LED on the charger will be solid red while the battery is charging. The LED will switch to solid green when charging is completed. A flashing red LED indicates an error, check:
 - A. The charger is properly connected to the USB port/adapter.
 - B. Your USB port/adapter **MUST** provide $\geq 1A$ output current.
 - C. Any noticeable damage to the battery you are trying to charge.
 - D. The battery is properly connected to the charger.
 3. Unplug the battery from the charger when charging is complete.
- **DO NOT** charge LiPo batteries with the included charger, only 6-cell NiMH batteries.
 - **DO NOT** allow the USB port to power down while the charger is connected to the battery.
 - **NEVER** leave the battery unattended while charging.
 - **ALWAYS** unplug the charger from the USB port and the battery when charging is complete.
 - **NEVER** charge a damaged battery.
