

VENDETTA RALLY

Update!

The Vendetta Rally now comes with the new Duratrax 7550 Auto-Set ESC. Please observe the following instructions when running your Vendetta Rally.

DURATRAX **ESC 7550**
electronic speed control with reverse

Speed Control Set-up

1. Switch on the transmitter.
2. Set the throttle trim to the middle setting.
3. Set the throttle reversing switch to the reverse setting.
4. Connect the battery to the ESC.
5. Switch on the ESC, the LED should alternate between red and orange. This will last a few seconds while the ESC sets the neutral point.
6. Once the LED is solid you will hear a series of 3 beeps. The ESC is now set and should work normally.
7. Apply throttle gently to check that the motor is running the correct direction. If the motor runs backwards, set the throttle reversing switch to the reverse setting and turn the ESC off /on again to reset neutral.
