

T6J-2.4 GHz Tech Notice

T6J-2.45 GHz Trainer cord-

Instructor's TX	Student's TX	Trainer Cord
6J, 4YF	6J, 4YF	FUTM4415
6J, 4YF	14MZ, 12Z, 12FG, 8FG, 10C, 9C, 7C, 6EX, 4EX (72MHz or 2.4 GHz FASST)	FUTM4405
14MZ, 12Z, 12FG, 8FG, 10C, 9C, 7C, 6EX, 4EX (72MHz or 2.4 GHz FASST)	6J, 4YF	FUTM4415

If connecting the T6J-2.4 GHz to another T6J-2.4 GHz or other SFHSS/FHSS transmitter, use the “micro to micro” (MM-TC) trainer cord (FUTM4415).

If connecting the T6J-2.4 GHz to a 72MHz or 2.4 GHz FASST transmitter, use the “micro to FG” (MM-TC-FG) trainer cord (FUTM4405). This is due to the voltage difference of the two transmitters.

If the T6J is used as the Student TX with any other transmitter than another T6J you can use either the FUTM4405 or the FUTM4415.

Never connect the T6J-2.4 GHz to a transmitter that has the large round (DIN) connector as it will cause the T6J-2.4 GHz to malfunction.
