ARF #12026

The Carl Goldberg Pitts Monster EP ARF is the brushless electric biplane you've been waiting for. This electric power Pitts is a semi scale reproduction of the original aerobatic show Pitts Model 12 Monster. Featuring aluminum landing gear, painted wheel pants and painted fiberglass cowl. It uses upper and lower ailerons for great response. The CG Pitts Monster ARF also features bolt on "I" struts, and pre-covered aluminum cabanes for rock solid wing attachment and authentic looking finish.

The CG Pitts Monster EP ARF's straight tracking and precise handling put it in a class above the rest. It's smooth and docile until you throttle up, then you'll see what this Monster can do; with awesome snaps that start and stop instantly, knife-edge capability that's extraordinary, and slow rolls you can stretch from horizon to horizon. And just as quickly as you let it loose, you'll be able to calm it down for a feather-soft landing.

You'll see the Goldberg value in its quality craftsmanship and phenomenal aerobatic ability. Plus the CG Pitts Monster EP ARF has an all-wood airframe and all-wood one-piece wing assembly to ensure accurate and lightweight construction. Top this off with a complete hardware package, and a sharp color scheme from premium iron on covering.
