ARF#12058

THE TRAINER THAT HELPS YOU ADVANCE.

The Protégé ARF is more than just a great trainer, it's the first trainer actually designed to keep pace with your piloting progress.

To begin with, the Protégé ARF's unique, refined force arrangement and raised-entry, flat-bottomed airfoil produces the perfect degree of inherent stability for predictable, confidence-building first flights. Then, as your skills improve, simple adjustments transform your Protégé into a gently responsive sport model capable of all the primary maneuvers - including outside loops. And all the while, you'll benefit from Protégé

ARF's arrow-like tracking, super-slow landings and surefooted ground handling.

QUALITY CRAFTSMANSHIP

The two piece bolt-on wing with aluminum wing tube and bolt-on stabilizer lets you easily transport to the flying field.

We've also included a complete hardware package including pushrods, fuel tank, & wheels. This 90% pre-built ARF has an all-wood airframe, jig built from lasercut parts, to ensure accurate and lightweight construction and a great color scheme from premium iron on covering. Get yours today and be at the field in no time.
