

# PT-19

SPORT SCALE .46/EP ARF

## MANUAL ADDENDUM

Before starting on **Step 5 on Page 7** of the manual, it may be necessary to test fit the front wing tabs into the former.

If the tabs are too wide for the opening in the former as shown above it will be necessary to remove material from the wider of the two wing tabs.

For removal of a small amount of material from the tab sanding is recommended.

For removal of a larger thickness of material a #11 blade can be used. **CAUTION:** Be careful not to cut through too much material. Sanding is recommended to finish removing material from the tabs.

Test fit the tabs into the former. If proper fit is achieved, proceed with **Step 5**.
