

# U-Can-Do™ SF

## TECH NOTICE

### Canopy

1. To remove the canopy, you must first push it forward and then pull up.

2. If it's difficult to remove the canopy, you may need to elongate the slots on the fuselage by approximately 1mm once the canopy is removed.

### **On Page 12, step 2, under *Installing the Landing Gear*:**

Please use the included four 6-32 x 1/4" set screws to secure the wheel collars.

The four 6-32 x 1/4" SHCS mentioned in the manual may not be included with the kit contents.
