

Great Planes® Gee Bee ARF

Addendum for installation of the pilot figure

Page 28, step 1, under "Finishing Touches"

The included pilot does not need to be painted but it does need to be trimmed to fit in the cockpit.

1. Cut the head from the body so the distance from the top of the head to the underside of the chin is 2-1/4" [57mm].

2. Use 6-minute epoxy to glue the head to the cockpit.
