

GREAT PLANES REACTOR EP 3D ARF

TECHNICAL NOTICE

1. Refer to page 10, step 6. The balsa spar doubler now has a thin balsa laminate glued to it. This laminate fits between the carbon strips on

the wing spars and should be the side of the doubler that is glued to the front of the spars.

Note: The Kit Contents (Not Photographed) section on page 6 does not list (8) 2x4mm self-tapping screws that are included with the kit for securing the adjustable clevises to the carbon pushrods.
