## INSTRUCTION MANUAL ADDENDUM

*Please read this instruction manual addendum before beginning assembly and replace the steps in the instruction manual with the steps in this addendum.*

### Page 9, step 1

The screw-lock connector in the rudder horn illustrated in the instruction manual is mounted to the wrong side of the horn. Mount the screw-lock connector to the **bottom** of the horn as illustrated in this photo.

### Page 11, step 4

Before mounting the ESC to the inside of the fuselage with double-sided adhesive foam tape, test fit your battery in the fuselage. If the battery fits tightly you may omit the foam tape. Or, if preferred, you may mount the ESC with a few small dabs of Zap Goo adhesive (PAAR3200) or similar.
