Exciting to see

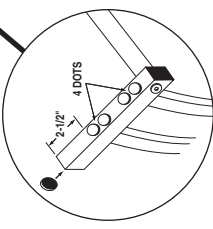

Hands-on Experience for the Customer

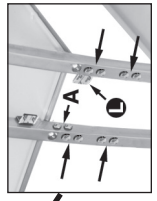

1 Assemble shelving unit as shown in illustration on page 2.

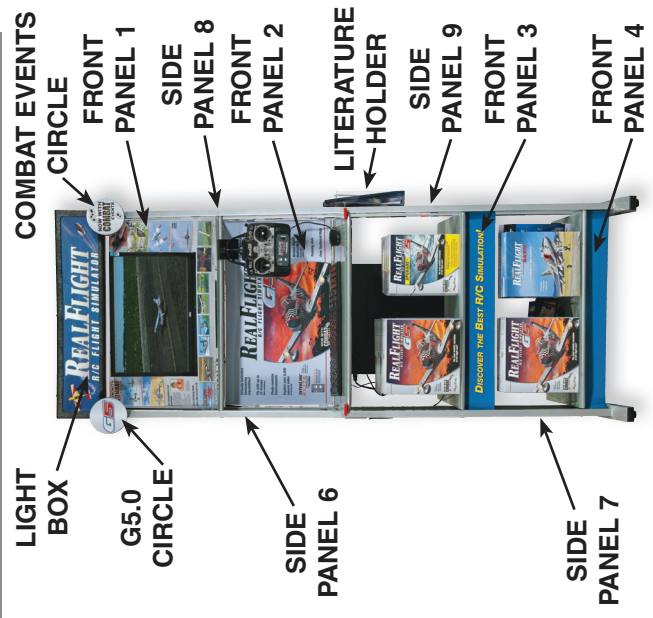

2 Apply 5 hook & loop dots to each side on the top rail. Place 1 on the front and 4 on top, 2-1/2" from the front edge as shown.

3 Apply 2 hook & loop dots to each of the 3 locations indicated by the letters A, B and C. Do this to both side frames. Keep the hook & loop together and peel off the backing from the loop side.

7 Peel off the backing from hook & loop dots on the side rails to apply signage.

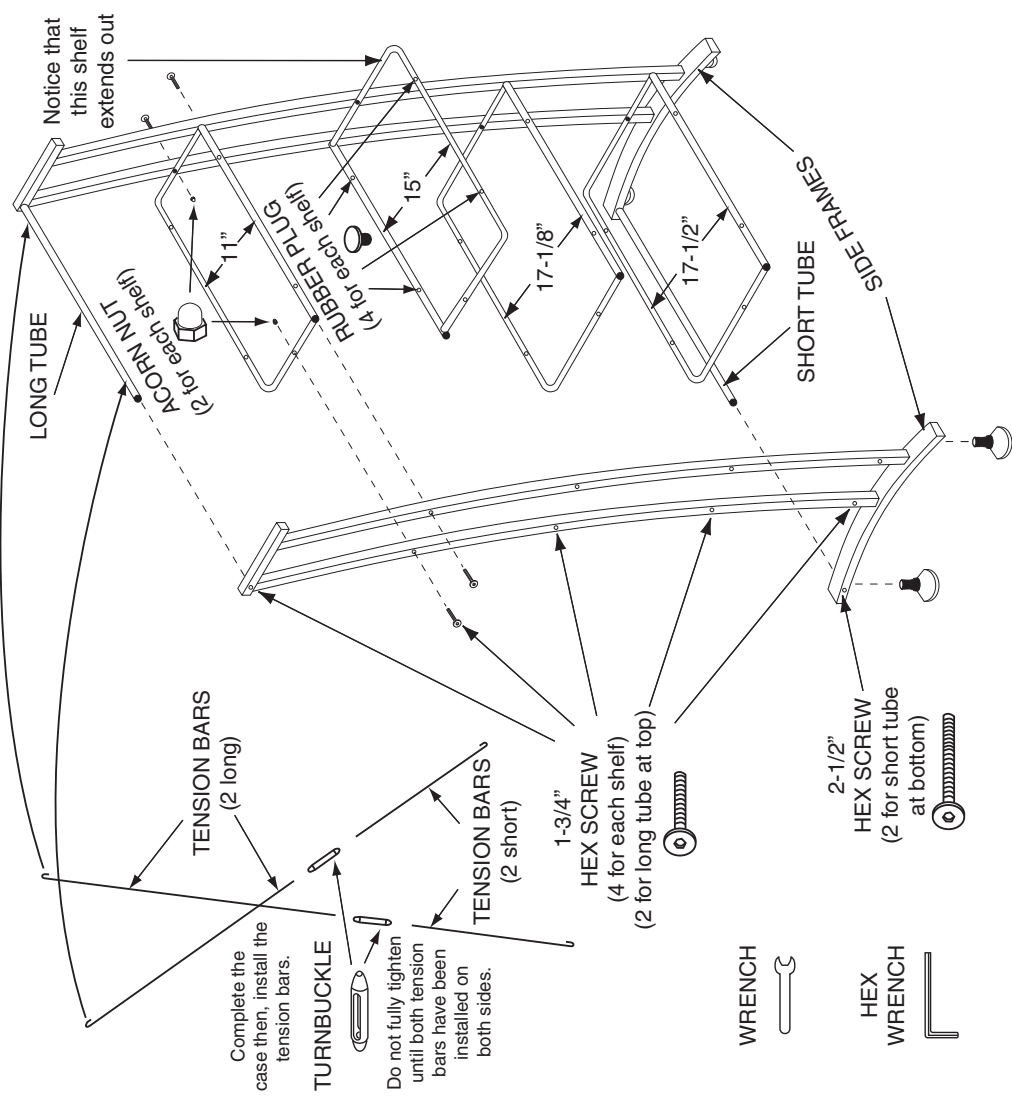

8 Attach **FRONT PANELS** 1 and 2 in order. Be sure to inset panels 1/4" from outside edge of rail using sign clips. Attach panels 3 & 4 using hook & loop dots.

9 Attach **SIDE PANELS** 6, 7, 8, & 9 to L-Brackets, starting with the top panels.

10 Attach literature holders to the side frames. Align the top of the holder with the screws on shelf #2.

11 Remove back panel of light box. Install fluorescent bulb. Replace panel. Attach the light box on top rail. Place it 2-1/2" from the front.

12 Attach Now With Combat Events circle on top left and G5 circle on top right.

Complete the case then, install the tension bars.

Do not fully tighten until both tension bars have been installed on both sides.
