

La Purisima Concepcion Instructions

Parts Drawing

• Before starting assembly, read through each step of the instructions and carefully study each photo. As you put the model together, it is a good idea to "test" fit the pieces together before using any glue.

• Spread out newspaper across the table or desk that you are working on. This will help to protect your work surface.

• Use scissors to trim any pieces where needed. PARENTAL SUPERVISION is recommended.

• Identify each piece of the model by matching it with the parts drawing above.

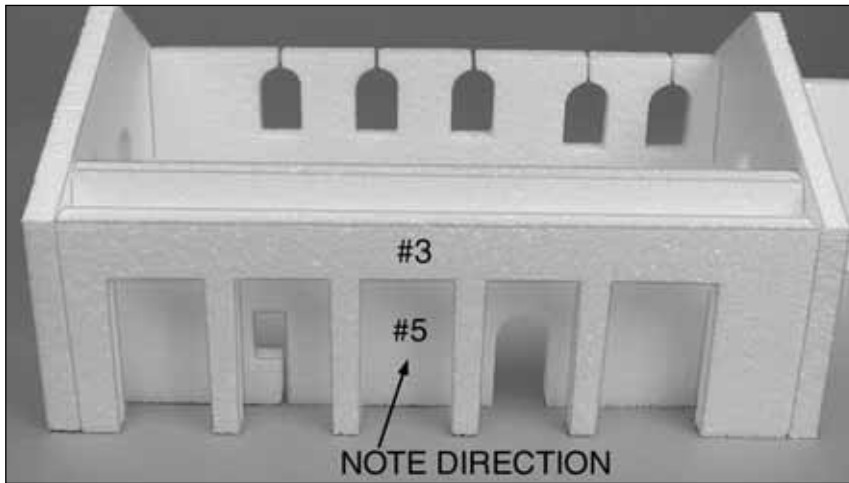

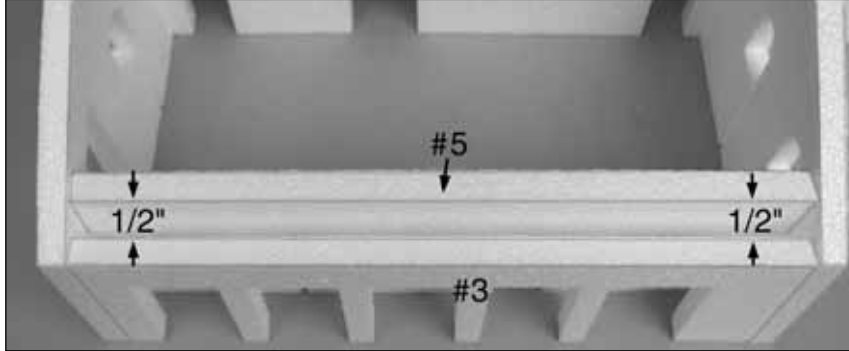

• Assemble the model with standard white glue. It is a good idea to hold the pieces together with toothpicks until the glue is dry. Once the glue is dry, twist the toothpick and carefully pull it out.

• Use a small brush, flat stick, or your finger to spread glue evenly on the surface.

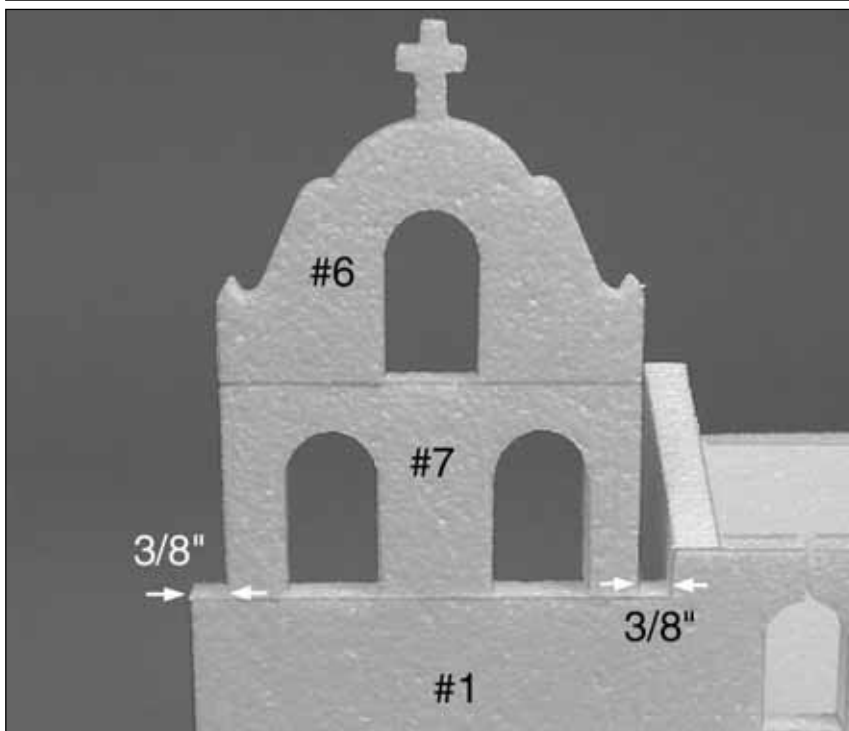

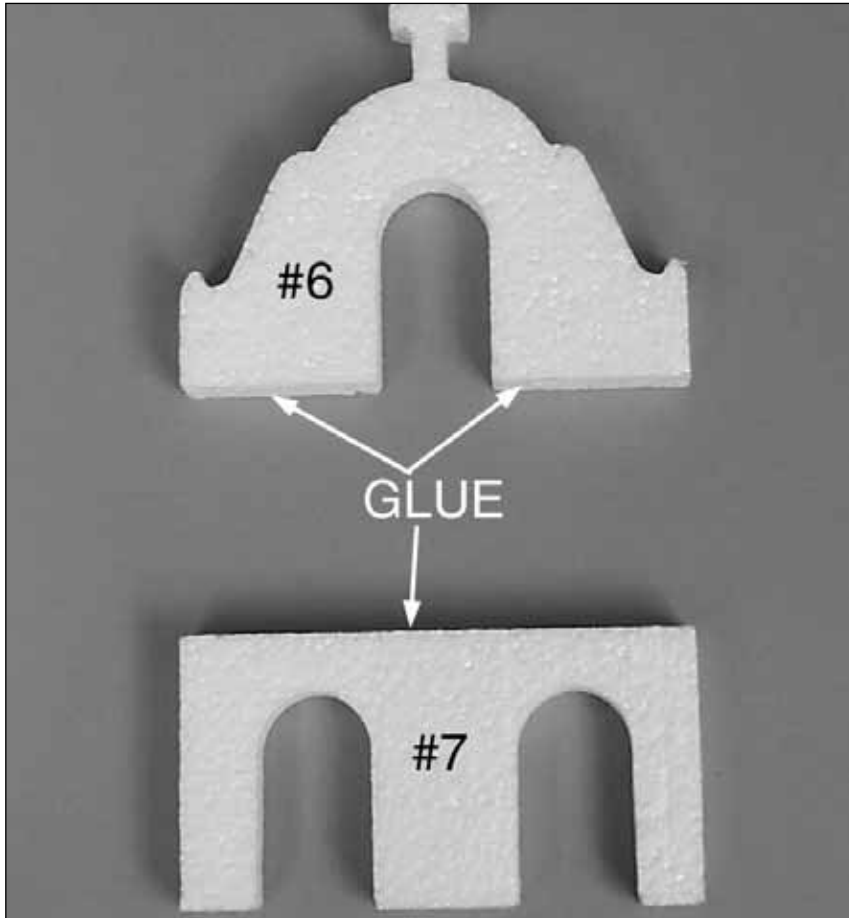

• Do not glue any of the pieces to the base until after Step 7.

Note: The missions can either be assembled on the cardboard sheet (included) or on a sheet of foam (not included).

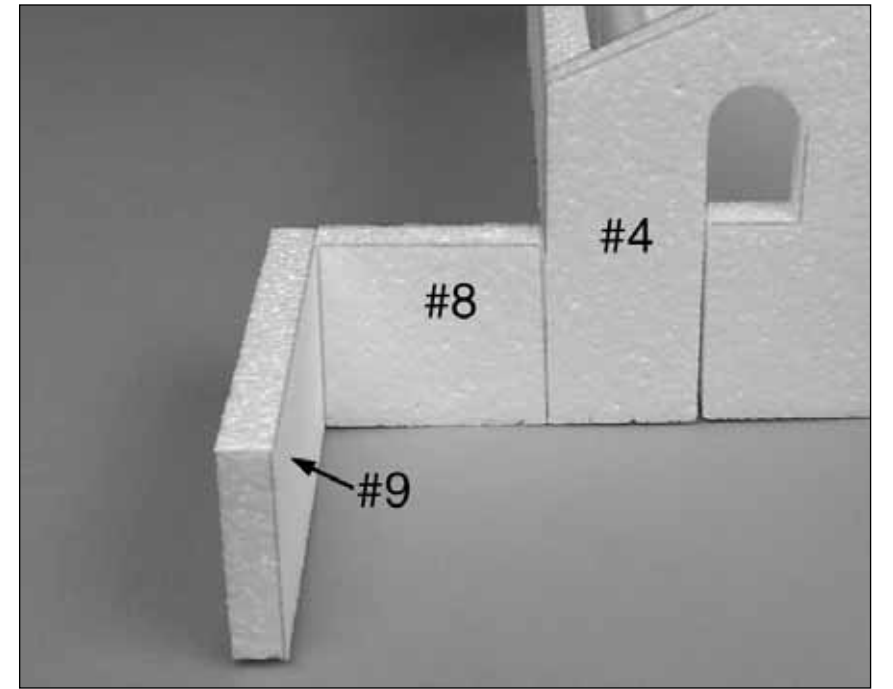

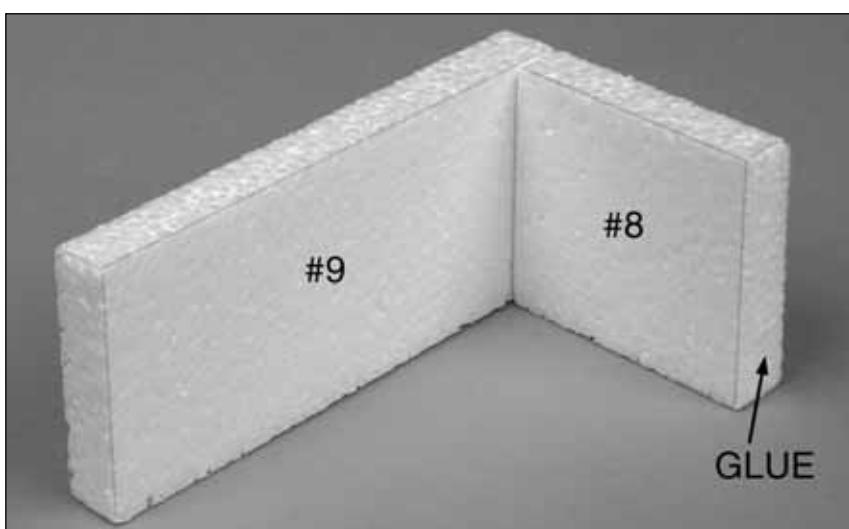

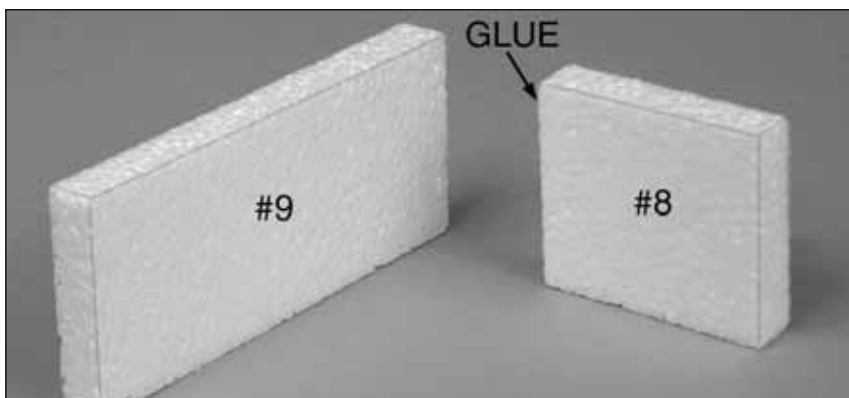

□ 4. Apply glue to the front and rear edges of #5 and put into place as shown below (note the direction). There will be a 1/2" space between #5 and #3.

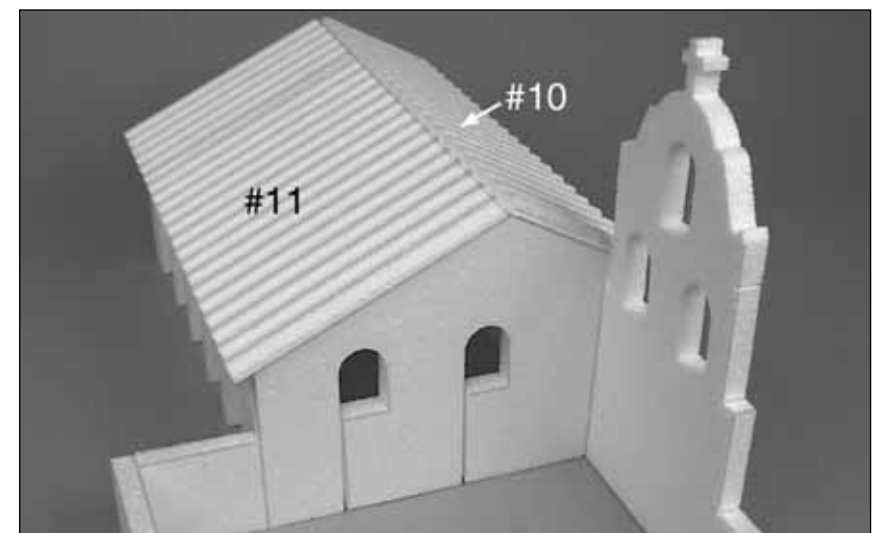

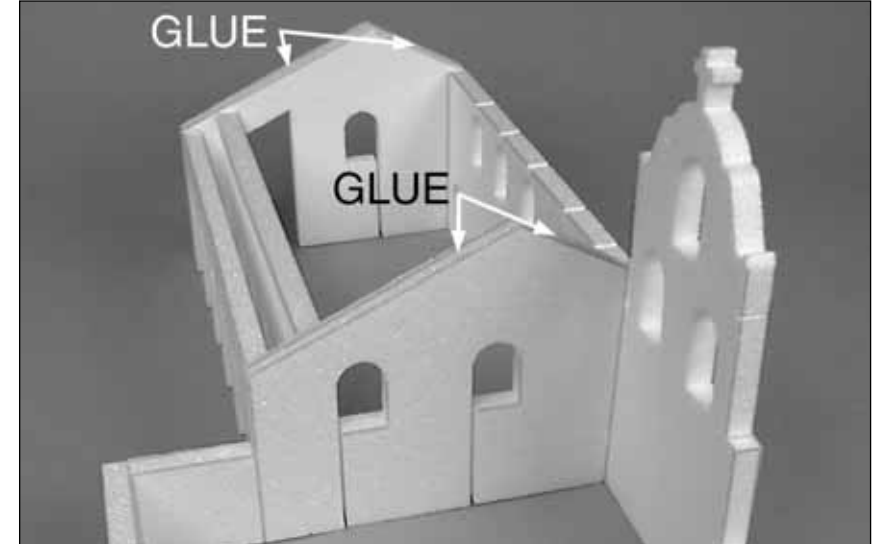

□ 5. Apply glue to the bottom edge of #6 and put into place atop #7. This is the "bell tower," and can be glued into place atop the front wall of #1 as shown. Leave 3/8" of wall on each side of the bell tower.

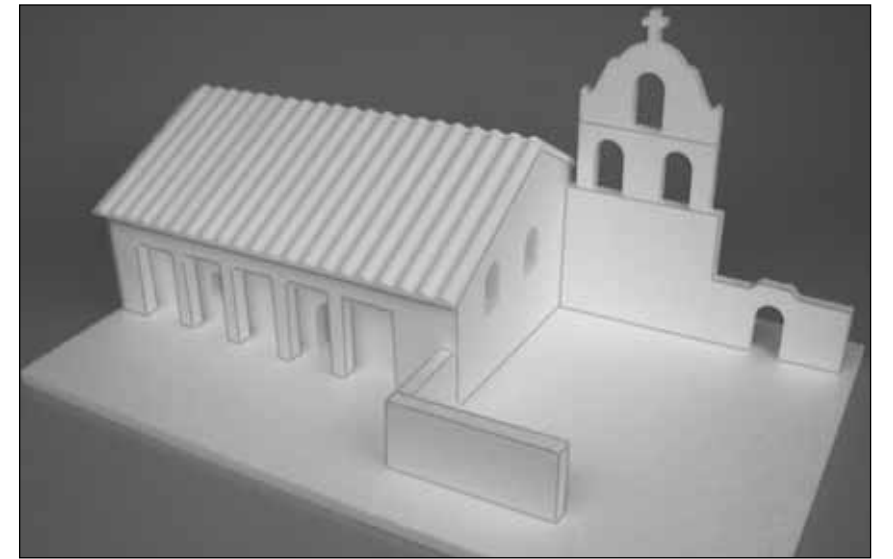

□ 6. Apply glue to the short edge of #8 and place it against #9, making sure that all edges meet evenly. This assembly can be glued to the side edge of #4 as shown in the photos that follow.

□ 7. Apply glue to the roofline and put the #10 and #11 pieces in place as shown below.

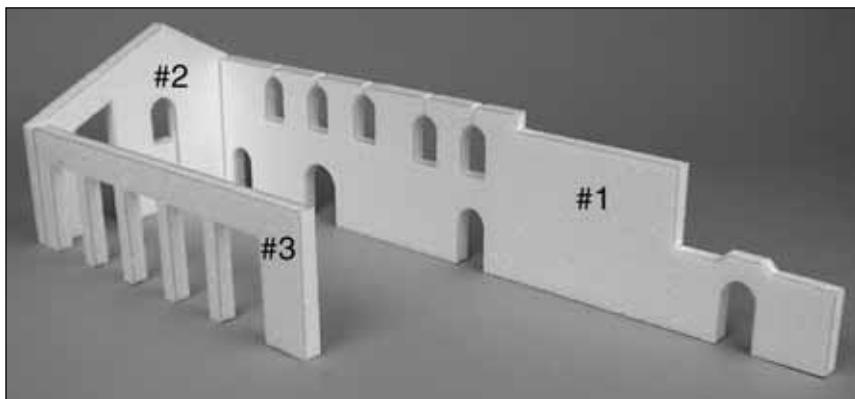

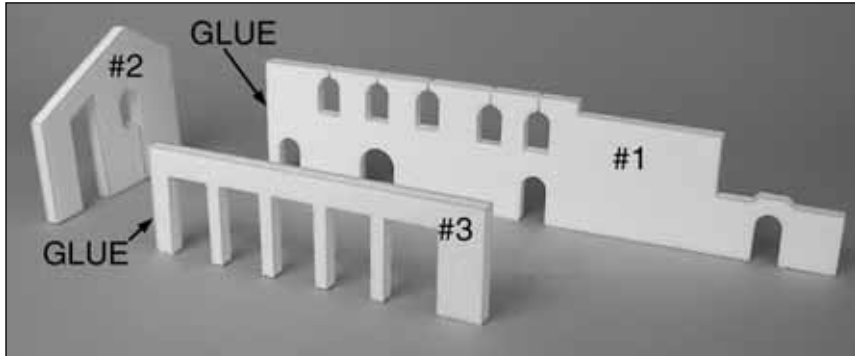

□ 8. Now that the mission is complete, it can now be glued to the base. You will want to be sure to glue it in place so that there are no edges hanging over the edge of the base. This will leave you enough room to create scenery for your model.

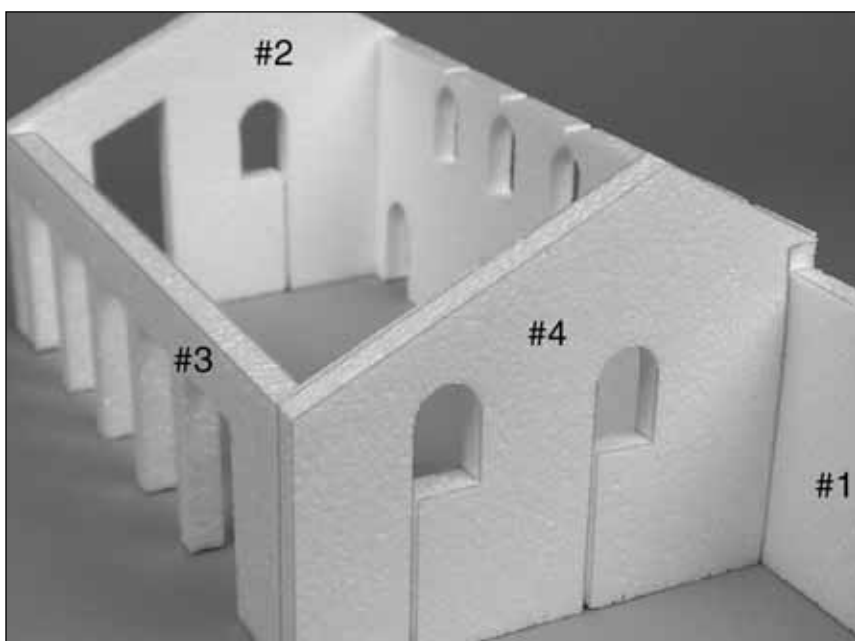

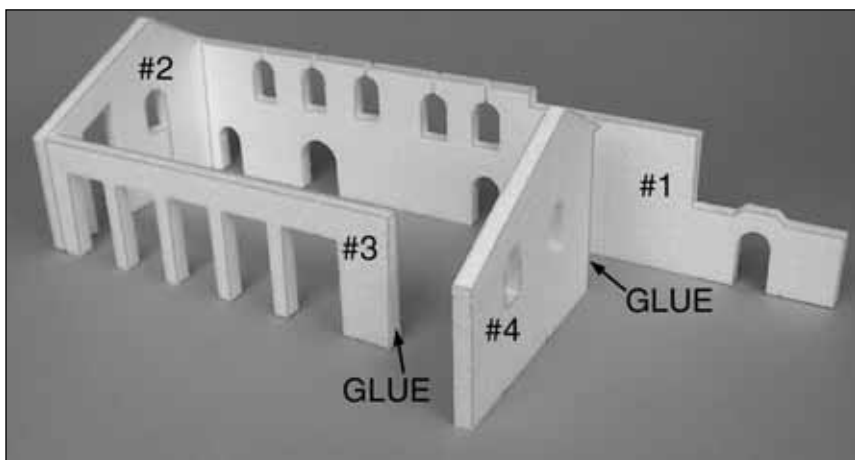

ASSEMBLY INSTRUCTIONS

□ 1. Place the 24" x 15" base on a clean, flat surface.

□ 2 Apply glue along the rear edges of #1 and #3 (note the direction) and place them against #2 as shown below. Make sure all edges are even.

□ 3. Apply glue to the front edge of #3 and to the right edge of #4. Put #4 into place as shown below. This section will be called the "main building."

FINISHING

- When you paint your model, use only water-based paints.
- Check with your favorite hobby dealer for accessories such as grass, shrubbery, grave markers, action figures...etc. that will add realism to your model.
