**8+**

# AXLE STRAIGHTENER

1. Lift the top of the Axle Straightener and insert an axle into the groove.
2. Replace the top and gently tap the top of the axle head with a hammer 2-3 times. Rotate the axle 45 degrees and tap again.
3. Turn the Axle Straightener as shown and gently tap the center of the tool with a hammer. Rotate the axle 45 degrees and tap the center of the tool again. Repeat this until the axle has been rotated back to its starting position.
4. Remove the axle and repeat on all other axles.
