

## ***Fly this plane with virtually any transmitter!***

Thank you for purchasing this Flyzone Transmitter-Ready model.

To take full advantage of the versatility that Tx-R offers, you will need Tactic's AnyLink™ or a Tactic 2.4GHz aircraft transmitter. AnyLink (TACJ2000) is an external 2.4GHz radio adapter that allows use of your own transmitter to pilot Tx-R aircraft, equipped with Tactic 2.4GHz SLT™ receivers.

Get your AnyLink from your favorite hobby dealer. To locate a hobby dealer, visit **Tx-Ready.com** and click "Where to Buy".

Before you can enjoy your new Tx-R aircraft, there are a couple of simple checks that must be completed.

1. Check your transmitter's compatibility with AnyLink; most transmitters are compatible. Use the chart on the other side of this sheet to confirm compatibility before proceeding with assembly of this model. Some transmitters may require optional cables not supplied with AnyLink. They are available from your favorite hobby shop, or visit **Tx-Ready.com** to find a shop near you.
2. Carefully read the instructions included with AnyLink and this Tx-R model before operation. **WARNING: AnyLink must be in Normal Mapping (1 Beep) when Futaba, Hitec or Tower Hobbies transmitters are used with Tx-R aircraft. If using a Spektrum or JR transmitter, the AnyLink must be in Alternate Mapping (2 Beeps).**

<b>AnyLink Transmitter Compatibility Chart*</b>		<i>Required optional adapter cable</i>			
		<i>TACM0003</i>	<i>TACM0004</i>	<i>TACM0005</i>	<i>TACM0006</i>
<b>Futaba®</b> <i>AnyLink Mapping mode 1 required for Tx-R planes</i>	4YF, 4YBF, 6J, 6EX, 7C, 9C, 8FG, 10C, 12FG, 18MZ	4VF, 5U, 6DA, 6H, 6A, 6YG, 6YF, 7NFK, 8U, 9Z			12Z, 14MZ
<b>Hitec®</b> <i>AnyLink Mapping mode 1 required for Tx-R planes</i>		Prism 7 & 7X; Focus 4 & 6; Flash 4sx; Flash 5 & 5sx; Eclipse 7; Neon Optic 5 & 6; Laser 4 & 6	Aurora 9
